XXX YEAR

A good deal of vigorous language has been used by paternal families at the direction of the State schools taking advantage of the holidays decreed by Government and closing those establishments. There is really no excuse for such a course, and the Minister of Education should give a piece of his mind to those responsible for it. Fifty men of the 4th of the Line, under Colonel Reyes, have left Mendoza to look after the Chilian troops in Argentine territory in the Andes. It is to be hoped nothing unpleasant will occur.

The Government at Montevideo has decided to pay full military honours to Bishop Soler on his arrival there next Sunday.

The good Rosarinos (ninety five of every hundred Rosario men are good fellows) have taken a sudden objection to "joining

in the town in January 200, and in thirty 244. The cause of this favourable turn of affairs is not stated, but we inclined to think, seeing all the unlet houses and homes in the place (according to the census of 1900), that the emigration of a great part of the population must have something to do with it.

The New York papers announce that the German daily of that city, the *Frankfurter Zeitung*, has been placed under control is now in the hands of Mr. John Riddler, the owner of two well run Catholic weeklies.

How! In the defamation case Pitt Rivers, editor of the *Picote*, now tried in the Cordoba court, has been proved beyond any ray that the priors of the Bank of that province had been a fac-simile of the National Government for legalizing old shipbuilders, a thing which would have been as acute as it is now. The impetuosity in Cordoba now is so terrible that principal debtors of the banks there a meeting, and, with tears in their eyes and a smile on their cheek (what a contrast to the *Frankfurter Zeitung*!) present of principal interest and mortification for an indefinite period, as not a man forgot they had enough red money in pocket to pay for his breakfast. Here's a contrast!

It is said to be the only country where it has made careful experiments with pigeons on war vessels. It now has no naval service connecting the fleet and shore, while Germany, Austria, Russia, and Italy, though each has a million pigeons, rely on the fleet.

to do. We certainly won't. Dr., an Austrian physician, asserts that the epidemic is exempt for six months from the effects of furthering, protection being afforded in the manner that vaccination protects small-pox. He has also noticed that the epidemic affords effective resistance rheumatism, but that essence of poisoning the persons are not secure from further stings, but from themselves itself.

It is not possible to exchange with any of our contemporaries in town and try that pour in on us daily, while appreciating their desire to exchange us. We relate them all as "divine" and wish them the most brilliant success.

Many of our most distinguished colleagues persist in thinking that what is wanted to cure the crisis is confidence. They are right, for the crisis of money who breakfast or dine at cafes, the intention of paying for the meal first-named currency; but, as they already forgot to confide such intention in the money, therefore they get outside in the crisis, the price of the money they really go down in a police cell. It is clear that the crisis has rendered it useless to pay for a breakfast or dinner with money; though the confidence (they may be said, an institution of the currency).

The printers, by turning a 6 upside down as you say Sunday that the interest on the Home Loan will be nine per cent, as is the figure.
